DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 1, 3, 4 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Frank (US Patent 6,181,019) in view of Hardigg et al. (US Patent 5,012,533).

Frank discloses an engine driven work machine comprising:

- A pipe frame (generally the elements labeled as 14)
- A transportable structure attached to the pipe frame (see fig 1)
- A sling fitting (14-5) provided above the pipe frame, the sling fitting having two ends (fig 1c).

Figure 1b of Frank discloses what appears to be pins holding the sling fitting in place however it is unclear whether or not the sling fitting is hinged to the pipe frame for rotation, Frank does not disclose a stopper.

Hardigg teaches a sling fitting (10) having two ends (17), the sling fitting being hinged (30) to a frame at the two ends for rotation with respect to the frame to provide a sling fitting that stores itself out of the way when not in use (Col 2 line 4) and a stopper (25) stopping the sling fitting in a near vertical direction (Col 3, line 67) for the purpose of restricting the pivotal movement to help stabilize the device during transportation to prevent damage (Col 4, lines 2-5).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the teachings of Frank and provide a sling fitting as taught by Hardigg, the motivation would have been to permit the storage of the sling fitting out of the way when not in use, and to restrict the pivotal movement, to stabilize the load during transport, preventing damage.

Regarding claim 3, a shock absorber (14a) is provided on a side of the sling fitting.

Regarding claim 4, the sling fitting has a bent section (16) extending at a right angle to a bottom edge of a center section (13) and approximately c-shaped sections provided adjacent to the two ends of the sling fitting.

Regarding claim 5, the C-shaped sections comprise hinge sections for rotationally supporting the sling fitting and for engaging with the stopper.

Response to Arguments

3. Applicant's arguments with respect to claims 1 and 3-5 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
